The truth is, it's never too late to pursue your dreams—you just need to know when it's time to move on. Welcome to the future of working: career-shapeshifting. Career-shapeshifters pursue life on their own terms, based on their individual circumstances and passions. Just because you have spent years in one occupation doesn't mean you can't pursue something new, something you are truly passionate about. Time to Move On is the roadmap you need for your journey. Mustafa Ammar, a career-shapeshifting pioneer, busts the seven career roadblocks that are getting in your way:

1. You need to be a "supreme specialist"
2. Change is too risky
3. It's too late to find your dream career
4. You have bills to pay
5. Focus on your strengths, not your weaknesses
6. Leaving your career is a "sunk cost"
7. You are already in your dream job
